HOW AND WHERE TO START

"The only way to start is to start, and the place to start is right here with what little we have and with even a negative quantity. In every case, we did not wait for experts to come, or for money to be appropriated, or for certain things to be done for us. Had we waited, we would still be waiting. Our only capital was ourselves, our health, our determination to succeed, and of course our own resources-land, artesian wells, cornels and some shovels, and good humour. We did not have any budget. We studied our needs, made plans, and went ahead as best we could to achieve our objectives".

- G BISHOP
